EDUCATION

B Tech in Electronics and Communication Engineering

2021 - 2025

Techno International Newtown | Kolkata, West Bengal

CGPA : 7.7

EXPERIENCE

EMERGENT | Product Engineer

Bengaluru, India | June 2025 - Present

- Handled and managed **end-to-end deployment** built on **FARM (FastAPI, React, MongoDB) tech stack**, ensuring stable production releases and smooth CI/CD workflows.
- Performed **root-cause analysis**, debugged critical production issues, and resolved high-priority bugs, improving **system stability and release efficiency**.
- Monitored application health and system performance using **Grafana** and **Google Cloud Platform (GCP)** monitoring tools to proactively identify issues and ensure high availability.

BOOST STAR EXPERTS | Web-Developer Intern

May 2024 - July 2024

- Developed and maintained **responsive web applications** using **HTML, CSS, JavaScript, and React**, improving **page load performance by 30%** and enhancing overall user experience.
- Collaborated with **UI/UX designers and backend developers** to refine interfaces and user flows, resulting in a **20% increase in user engagement** and a **15% reduction in bounce rate**.
- Conducted **debugging, testing, and code reviews** to ensure high code quality, functionality, and cross-browser compatibility.

SKILLS

Programming Languages: JavaScript, TypeScript, Java, Python

Frontend / Backend: HTML5, CSS3, React.js, Bootstrap, jQuery, ViteJs, Node.js, Express.js, REST APIs

Databases: SQL, MongoDB

DevOps / Tools: Docker, Git, GitHub, CI/CD, Grafana, GCP, Postman

PROJECTS / OPEN SOURCE

Personal Portfolio Website | ishaaque-portfolio.netlify.app

React.js, ViteJs

- Built and deployed a fully responsive portfolio website using React.js and Vite**
- Optimized performance for fast load times using Vite's lightweight build system**
- Deployed on Netlify with CI/CD, enabling seamless updates and high availability**

Sorting Algorithm Visualizer | [Github](#)

JavaScript

- Built an **interactive web-based sorting visualizer** using **JavaScript, HTML, and CSS**. Enabled users to control **array size, speed, and algorithm selection** for better understanding of time complexity
- Implemented **Bubble Sort, Quick Sort, Merge Sort**, and other algorithms with **real-time visual comparison**
