## EDUCATION

### B Tech in Electronics and Communication Engineering

2021 - 2025

Techno International Newtown | Kolkata, West Bengal

CGPA : 7.7

## EXPERIENCE

### Emergent | Product Engineer

Bengaluru, India | June 2025 - Present

- Leveraged AI-driven deployment agents to manage end-to-end application releases on the **FARM stack (FastAPI, React, MongoDB)**, improving deployment efficiency and release consistency.
- Built RAG-based systems to automate internal workflows, reducing manual effort by 40% and improving output relevance.
- Engineered and maintained automated **CI/CD pipelines** using **Docker and GCP**, enabling faster release cycles.
- Diagnosed and resolved critical production issues through root-cause analysis, reducing downtime by 35% and improving system reliability.
- Monitored and optimised system performance using **Grafana, GCP, and Postman**, achieving 99.9% uptime and reducing integration bugs by 25%.

### BOOST STAR EXPERTS | Web-Developer Intern

May 2024 - July 2024

- Developed and maintained **responsive web applications** using **HTML, CSS, JavaScript, and React**, improving **page load performance by 30%** and enhancing overall user experience.
- Collaborated with **UI/UX designers and backend developers** to refine interfaces and user flows, resulting in a **20% increase in user engagement** and a **15% reduction in bounce rate**.
- Conducted **debugging, testing, and code reviews** to ensure high code quality, functionality, and cross-browser compatibility.

## SKILLS

**Programming Languages:** JavaScript, TypeScript, Java, Python

**Frontend:** HTML5, CSS3, React.js, Bootstrap, ViteJs

**Backend:** FastAPI, Node.js, Express.js, REST APIs, JWT Authentication

**DevOps & Tools:** Docker, GCP, Git, GitHub, CI/CD Pipelines, GitHub Actions, Postman, Grafana

**Applied AI:** RAG, LLM Integration, Prompt Engineering, AI Workflows

**Databases:** SQL, MongoDB

## PROJECTS

### Sorting Algorithm Visualizer | [Link](#)

JavaScript

- Designed an intuitive UI with adjustable input sizes and speed controls, enabling users to visually analyze algorithm performance and time complexity.

- Implemented Bubble Sort, Quick Sort, Merge Sort, and more, allowing users to compare sorting techniques in real time.

## AI-Powered Task Management App | [Link](#)

*FastApi, React, MongoDB*

- Built a full-stack task management system using FastAPI, React, and MongoDB with secure JWT-based authentication and scalable REST APIs.
- Integrated LLM-driven workflows for intelligent task generation, prioritization, and dynamic completion planning.
- Improved backend throughput by leveraging asynchronous FastAPI endpoints, enabling faster concurrent task processing and reducing request latency.
- Enhanced performance by optimizing MongoDB queries and indexing frequently accessed fields, resulting in faster task retrieval and updates.

## Personal Portfolio Website | [Link](#)

*React.js, ViteJs*

- Developed a fully responsive portfolio website using React.js and Vite.js to showcase projects and skills.
- Implemented optimized performance with fast loading times, leveraging Vite's lightweight build system.
- Deployed the website using GitHub Pages / Netlify for easy accessibility and real-time updates.

## CERTIFICATIONS
